Energy Management Policy

Aeroflex Co., Ltd. is located at 111/7, 111/11 Moo 2, Tambon Makhamku , Amphur Nikhom Pattana, Rayong, which engages in the manufacturing of closed cell elastomeric thermal insulation rubber and other related products, and is aware of the importance and commitment to develop the system with energy efficiency, as to reach continuous, sustainable and maximum effectiveness. This is for energy management to preserve natural resources, good environment and low-cost production, which is measured by the participation of all levels of employees, and is considered as a part of the routine job.

Therefore, the Company has assigned energy management policy as the guideline for operation as follows:

1. The Company will conduct the energy management in accordance with other laws and associated regulations. This energy management is considered a part of the Company's operations.
2. The Company will develop and improve energy efficiency on manufacturing business continuously.
3. The company will set annual energy management plans and targets, including communication and encouragement to all levels of employees to understand and cooperate properly.
4. The company assumes energy management to be the responsibility of manager and all levels of employees in the company to cooperate in monitoring and evaluating the performance of energy management.
5. The Company will provide sufficient support, allocate budgets, man power, resources and energy resources information effectively, including the working time, training, and all participation in presenting ideas for energy development purposes.
6. The company will support the outsourcing, purchasing the equipment, machinery, products or services for energy saving, including the design for improved energy performance.
7. The management and the energy management team will review the policy, objectives, targets and energy action plans annually.

Effective date from February 01, 2017
