

AEROFLEX[®]-FO Class 0

CLOSED CELL ELASTOMERIC THERMAL INSULATION

*For high Efficiency of fire
Propagation Performance*

AEROFLEX®-FO Class 0

AEROFLEX-FO Class 0 is a light weight, EPDM Modified flexible closed cell elastomeric thermal insulation in both sheet and tube form designed for insulating liquid cooling and heating pipe lines and also air ducting system to save energy and prevent condensation.

AEROFLEX-FO Class 0 standard sheet and tube elastomeric thermal insulation are widely used to save energy and prevent condensation problem on chilled water and refrigeration systems. They also efficiently reduce heat flow on hot water plumbing, liquid heating and dual temperature piping.
